

# WAYS TO ELEVATE YOUR TRANSIT BUS SURVEILLANCE SYSTEM

Unlock the full potential of your surveillance system  
to enhance transit safety and boost efficiency.

# 01

## Amp up your fleet safety by upgrading your recorders to add HD and High-Versatility Cameras

Get access to critical details where and when you need them.

Video surveillance is more than just video. Your fleet safety program should help you capture events onboard and, on the roads, identify risky driving behavior, and provide insight into what's happening in your fleet.

Standard-definition cameras may not provide the coverage you need and are not as good at producing footage that can be used for facial identification or close-up, zoom-in investigations. HD cameras will deliver sharper, clearer images, and are perfect for identifying fine details when you cannot risk losing important evidence, such as:

- License plate capture
- Accident reconstruction
- Facial identification

This is where upgrading to a high-definition recorder like the **DH4v2**, **DH6**, **DH8** or the **NH16v2** makes good sense. These recorders allow you to record 4, 6, 8 or 16 camera views in full high definition while maintaining support for existing HD and standard-resolution cameras. So, don't immediately kiss your SD cameras goodbye. Our recorders can work with them.

# 01

These recorders enable you to access the incredibly versatile **360° Fisheye IP Camera** with its highly desirable full vehicle views, so you don't miss an inch of your vehicle.

**But wait, there's more!**

**Each of these recorders feature an H-Series Ethernet Interface for 3rd party devices. This interface shares GPS, DVR Health (Rec Status, VLOSS, Media Status), Alarm Status, Alarm Input State, and Signal Input State to 3rd parties for increased fleet insight.**

Your video surveillance solutions are the core of your fleet safety systems. Incremental updates enable them to provide the high level of safety you and your passengers rely on and a backbone for the critical fleet safety and efficiency solutions mentioned in this e-book.

# 02

## Cut the Cords! Wireless Connectivity for your fleet safety & efficiency needs

Maximize value, increase safety,  
reduce risk, and lower operating costs.

Enhance your transit bus surveillance system with wireless capabilities. Get a **Safe Fleet Smart Reach® All-in-One-Router** and open the door to value, safety, and productivity tools:

### Wireless Video Uploads

Say goodbye to manually pulling media files. Automate the process! Receive video footage the minute your bus returns to Wi-Fi coverage, from the comfort of your desk.

### Live Video Streaming

See what's happening onboard your bus in real-time for timely and accurate responses to events as they occur.

### Wi-Fi On-Board the Bus

Provide passengers with enhanced access to information while onboard and make their journey more productive and entertaining.

# 03

---

## Navigate with Precision using GPS Integration

Get the complete and accurate story – every time! Correlate events on your bus with live GPS location-based information.

**GPS Integration allows you to:**

- Respond to the public and authorities with the utmost confidence.
- Know exactly what took place and where it happened.
- Gain intimate knowledge of all the external factors and how they contribute to bus and passenger conditions.

# 04

## Safeguard Everyone on the Bus!

Help your drivers strive for best practices with Driver Performance Coaching.

Identify risky and potentially dangerous driving practices. Better understand the conditions that generated the behavior in question and use the data to correct and/or coach for improvement as the behavior occurs.

- Hard braking
- Fast acceleration
- Sharp cornering

# 05

---

## Elevate your Insight with Live Streaming

Gain unparalleled situational awareness by observing real-time events on your transit vehicles, enabling swift and accurate responses to unfolding situations.

Access live video footage, ensuring timely interventions in critical scenarios.

**Leverage the technology that simultaneously captures real-time footage for immediate response and records events in high resolution for thorough analysis afterward.**

# 06

## Collision Avoidance Systems: Drive Smarter, Safer

The best accident is the one that never happens.

Upgrade your fleet with **Collision Avoidance Systems** to steer clear of potential mishaps. These systems, designed to cut blind spots and alert drivers to nearby obstacles, are your frontline defense against accidents, ensuring your vehicles stay on track.

- **Safety Cameras:** Empower your fleet with dash and backup camera/monitor systems, giving drivers an extra set of eyes.
  - » **ThruView Assist™** Collision Prevention: A camera that captures and transmits the view blocked by the A or B-pillar, helping reduce left-hand turn pedestrian strikes and minimizing accident rates.
- **Proximity Sensors:** Detect obstacles around the vehicle, instantly notifying drivers of potential dangers.
- **360° Around Vehicle Monitoring:** Wipe out blind spots that often lead to accidents, providing a safety boost for operators and pedestrians alike.
- **Mirrors:** Explore a variety of custom mirrors for fleet vehicles, tailored for improved visibility. Options include:
  - » **Dual View Assist™:** A rearview mirror with an embedded backup monitor, offering a clearer view during reversing.
  - » **MirrorLESS Video Mirror System:** An innovative system that replaces traditional mirrors with cameras and LCD screens, offering a safer and more cost-effective solution to minimize blind spots.

Elevate safety, reinforce efficiency, and ensure your fleet operates with precision. After all, preventing accidents isn't just good for business; it's a pledge to a safer future.

# About Safe Fleet

Safe Fleet has a vision to reduce preventable deaths and injuries in and around fleet vehicles. We are redefining what fleet safety means with one-stop access to customized, integrated, and intelligent solutions that answer

today's safety needs and anticipate tomorrow's challenges. By making fleets smarter, we make them safer. Without safety first, efficiency and productivity are not even options.
