

Transit Infotainment System

Enhance on-board safety and passenger experience

Keep your passengers safer, more informed and enable recurring revenue streams with a transit infotainment system.

- Discourage unwanted behavior
- Keep your passengers informed
- Capitalize on additional revenue streams

Increase Passenger Awareness

Display video from security cameras inside your bus, increasing awareness among passengers that they are being recorded as a means to deter bad or illegal behavior.

Provide Your Passengers with Real-Time Updates

Display schedule updates including service change or public service announcements.

Enable Digital Advertising

Earn additional revenue through on-board advertising that is remotely managed (including the updating of advertisement-related media files).

Enhance On-Board Safety and Passenger Experience

Media Player Features:

- Portable, compact design
- Media content including images and video can be displayed based on pre-defined order or priorities
- Media is pushed to bus screens via a server
- Content can be swapped out at a moment's notice without rewriting the schedule or recreating a campaign
- Networking is via a Wi-Fi connection. Campaigns are downloaded when buses establish Wi-Fi connections.

Monitor Options:

15.6" Rugged Public Display Monitor

- Mounted across from stepwell (above driver) to display passengers as they board
- Multiple video inputs support either a camera or a media player option

21.5" / 32" Rugged Public Display Monitor

- Mounted behind equipment cabinet facing rear of bus.
- Optional secondary location on panel at rear doors facing rear of bus
- 21.5" Monitor supports both a media player and camera system. 32" Monitor supports either a media player or camera system
