

Safe Fleet® FOCUS® H3™

Intelligent In-Car Video System

The Focus H3 is an end-to-end in-car evidence system for law enforcement, featuring ALPR, secure cloud uploads, and reliable recording. With built-in encryption and smart power management, it protects sensitive media.

Designed for ease of use and future-ready integration, it ensures predictable costs and seamless tech compatibility.

Purpose Built for Law Enforcement

Delivering a streamlined, purpose-built solution with core features that matter. Its intuitive design supports real-world tasks, making it a smarter, more efficient way to work.

Safe Fleet Ecosystem Integration

Works with your current tools and workflows, removing the hassle of juggling multiple platforms. It integrates with your FOCUS X3 body camera via automatic time sync and audio sharing to deliver high performance, unified support, and a consistent user experience.

Field Upgradeable ALPR

Lower costs and streamline rollout with license-based ALPR activation, making it easier to enhance officer efficiency and improve community safety.

Safe Fleet® FOCUS® H3™

Intelligent In-Car Video System

Real-Time Cloud Integration

Designed to work with cellular connectivity, the H3 enables live streaming, secure uploads, and smart alerts – boosting officer safety and situational awareness. With cellular and Wi-Fi support, critical footage is prioritized for immediate upload, while nonessential data is deferred to save costs. Powered by Safe Fleet Smart Cloud on Microsoft Azure® Government, this seamless connectivity keeps officers in the field and command staff informed in real time.

FailSafe Technology

Uses Failsafe technology to ensure critical video is always captured. A secure 256 GB internal drive records continuously, even if the system isn't manually triggered – so vital evidence is never missed.

Beyond Plates: Full Vehicle Intelligence

Embedded automatic vehicle detection and license plate recognition, available via a cloud license upgrade. Provides real-time alerts, BOLO, hotlist management and Power BI dashboards that transform raw data into actionable insights, enabling faster informed decision making.

High Camera Counts

Supports up to 5 cameras. This expanded setup improves officer safety, reduces blind spots and strengthens evidence collection – providing greater clarity and transparency for investigations and incident reviews.

Enhanced Purchase Transparency

Know exactly what you're buying, there are no bundled packages with vague inclusions, no hidden fees, and no surprises. It's a straightforward, honest approach that puts control back in your hands and ensures you're investing in a solution that's clear, reliable, and built for your needs.

Intentional Flexibility

Offering smart defaults and flexible options. It fits easily into existing workflows, helping teams work more efficiently with less effort.

High-Definition Video, Smaller File Size

Configurable HD cameras provide high efficiency video compression for improved evidence capture, transfer, and management.
