

Safe Fleet® FOCUS® X3™

Extended Run-Time Body Camera

The FOCUS X3 Body Camera combines field-tested durability with the latest in LTE connectivity, power management, and HD recording – delivering the essential tools officers need to operate safely, efficiently, and confidently.

Designed for full-shift performance, it offers high-quality video and audio, configurable ID indicators, up to two minutes of pre-event recording, automatic triggers, and secure, encrypted evidence uploads via the Safe Fleet Smart Cloud.

LTE Connectivity

Enables live streaming, secure uploads, remote access, and smart alerts – enhancing officer safety, situational awareness, and evidence management.

Proven Reliability & Modern Innovation

Combines trusted, field-tested durability with advanced technology, delivering the essential functionality officers need to perform their duties safely, efficiently, and confidently.

Easy to Use

Delivers incredible ease-of-use features including automatic dynamic lighting adjustments, an instant status notification display, image stabilization and audio-only recording.

Safe Fleet® FOCUS® X3™

Extended Run-Time Body Camera

Make it easier to capture and manage detailed, high quality evidence throughout an entire shift.

Stay connected and protected with LTE-enabled live streaming, secure uploads, remote access, and smart alerts – boosting officer safety and situational awareness. The X3 body camera is built for endurance, offering up to 14 hours* of battery life and continuous operation even while charging. Fast, magnetic cable charging keeps you powered on the go, while seamless vehicle integration automates sensor systems like light bars, sirens, and doors.

Enhance field efficiency with the FOCUS View App, giving you quick access to camera features when you need them most. The X3 works effortlessly with Safe Fleet’s In-Car Video Systems and accessories, creating a unified, reliable evidence capture solution that fits right into your workflow.

LTE CONNECTIVITY FEATURES:

Cellular or Wi-Fi and Priority Evidence Uploads

Upload video evidence via Cellular or Wi-Fi, based on operational needs. Priority upload intelligently manages data costs – critical footage is sent over cellular, while non-priority video is deferred to Wi-Fi or docked upload. All transfers are secure, automatic, and powered by the Safe Fleet Smart Cloud, built on Microsoft Azure® Government.

Live Streaming

Empower command staff to view incidents live, enabling faster, more informed decisions during critical, active/ tactical, high-stakes events.

Device Health

Receive proactive maintenance alerts to keep cameras fully operational.

Officer Needs Assistance Alert

Improve response times in high-risk situations, especially when an officer can’t call for help, ensuring faster support and greater safety.

Remote Body Camera File Retrieval

Speed up investigations and protect critical footage with detailed log file access – making it easy to diagnose field-reported issues quickly and accurately.

DEVICE FEATURES:

Enhanced Data Security

Access to cloud services and encryption is secured through X.509 certificate-based authentication, using the robust AES-256 encryption standard.

Enhanced Multi-Tasking

Supports simultaneous local recording, live streaming, cloud uploads, and configuration or firmware updates – ensuring uninterrupted operation and maximum efficiency in the field.

In-Vehicle Device Integration

Get full compatibility with Safe Fleet in-car video systems, mobile devices and laptops for viewing, tagging and uploading evidence.

Seamless Device Usage

Configure to notify the user of camera status via vibration, audible or LED modes.

Gain Additional Perspective

Captures video from optimal angles using the optional clip-on lens, which also allows quick control of recording and audio muting for added convenience in the field.

Increased Ease of Movement

Flexible mounting and camera options allow for easy and secure attachment to any uniform or vest equipped with a MOLLE loop.

Improved Audio

Captures high-quality audio with built-in noise reduction, ensuring clear recordings in dynamic environments.

Magnetic Charging & Data Connector

Features a breakaway magnetic connector for effortless charging and secure evidence transfer, combining convenience with durability in the field.

* Cellular uploads may reduce battery life, depending on activity levels.
