# Safe Fleet Nexus Video Management

Cloud Video Evidence Management Software

Eliminate the need to manually pull media files! Have video evidence wirelessly uploaded to you while you sit at your desk through Wi-Fi, Cellular or both for the most efficient and cost-effective approach to managing video. Know the status of your surveillance system with the click of a mouse and be confident your data is entrusted to the best security measures available today.

Know if Your Cameras are Recording NEW

Get system status updates and receive weekly snapshot camera checks to help identify signal loss, obstruction, or other issues, so you can be confident your system will capture evidence when you need it most

Safeguard your Data

Keep your video evidence protected throughout its entire lifecycle – from capture and upload to secure cloud sharing and audit-ready storage – backed by enterprise-grade security measures and access controls

Automatic Video Uploads

Access your video footage the minute your bus returns to coverage (Wi-Fi connectivity) or **immediately after the event** (cellular connectivity)

SAFE SF FLEET

Driving Safety Forward™

Eliminate Avoidable Risk

Not having to manually pull media files means your media remains safe and operational inside your recorder.

Enhanced Security

Nexus Video Management meets SOC 2 Type 2 and ISO 27001 Certification, plus includes secure, audit-tracked sharing to help safeguard video throughout its lifecycle.

Have Insights Delivered to You:

Automate how your fleet insights are delivered to you. Setup regular or one-off reports, run them as needed or on a regular schedule for up-to-date knowledge of what your fleet is doing.

Manage Video Hardware and Requests Easier

Simplify the management of your recorders with remote configuration and video requests wtih built-in workflows to manage large volumes of queries and the tracking of events.

Play MP4 Files with Ease   NEW

Convert proprietary footage to MP4 and view it instantly using Nexus built-in player – no third-party software required.

Simplify Evidence Management

Cloud technology centralizes video storage and management, making it easier for administrators to access and analyze footage as needed.

Get your data when you need it. Easy. Safe. Accessible.

Fully in the cloud for enhanced access, sharing, chain of custody and security.

Cloud Storage

No strain on IT Resources

Infinite Scale Options

Request and view video evidence from anywhere from any device

No requirements to maintain or manage video server

Access Your Files How You Want to:

Cellular Connectivity	Treat all evidence like urgent evidence – **automatically get all your files now**
Wi-Fi Connectivity	**Automatically get your files when your vehicle returns to Wi-Fi coverage**

Safe Fleet leads the industry in security and compliance – certified!

Third-party audits and certifications available including SOC 2 Type 2 and ISO27001.
