

Safe Fleet® Duet™ Camera System

Dual lens camera video surveillance system for maintenance vehicles

Gain firsthand knowledge of exactly what happened and make decisions that reflect on better use of your school bus fleet.

Get more than protection and all the control with a small footprint, dual lens camera and recorder combination that provides sizable retention options, fixed costs and complete data ownership.

Small Footprint

The camera has a footprint smaller than a smartphone and discretely mounts to the windshield without restricting a driver's view.

Own Your Own Data

Access and download your data as often as you like. There are no size restrictions either – download as much or as little as you require.

Integrates with existing Safe Fleet Systems

Customers are able to access Safe Fleet Duet insight from their existing Safe Fleet on-premise or cloud-based evidence management and viewing systems.

Safe Fleet® Duet™ Camera System

Your fleet isn't fully protected if your maintenance vehicles aren't protected

Camera modules can be individually adjusted, and the in-cab, inward-facing camera features a wide VFOV.

The system features a single audio channel to record in-cab activities.

Both camera modules feature high-definition 1080p AHD video.

Know Exactly What Happened

Get irrefutable evidence of exactly what happened to better respond to situations as they arise.

Increase Fleet Safety

Ensure your maintenance teams operate their vehicles in a safe manner and represent your school district well.

Make Better Use of Your Fleet

Make better business decisions that ultimately reflect on better use of your maintenance fleet.

Manage your Maintenance Fleet More Efficiently

Know which vehicles are on the road, in the repair shop or in the yard.

Own your Data

You own your data and have access to it whenever you want.

No Hidden Costs

There are no extra costs for storing or accessing your video data.

Safe Fleet Duet - forward-facing view

Safe Fleet Duet - in-cab/driver view

Future Proof System:

Multiple Available Channel Options

The dual lens camera requires two recorder channels, leaving remaining channels for additional needs such as back-up cameras.

Live Audio and Video Streaming

Live audio and video streaming is available with the addition of a cellular router and the data plan of choice.

Driver Behavior

Recorder features a built-in accelerometer, which can support future Safe Fleet driver behavior programs, that can be turned on 'like the flick of a switch.'
