

Safe Fleet® Live+

Real-time GPS Tracking and Fleet Management with Integrated Video Surveillance

Gain comprehensive and instant insight on your fleet.

Real-time peace-of-mind.

- One source for all your fleet information
- Increase data accuracy and response time in any situation
- Virtual access to the driver's seat

Maximize fleet efficiency and respond to safety concerns — in one convenient web-based application, fully integrated with your routing and video systems.

Locate and Track Fleet in Real-Time

Pinpoint vehicle location immediately, and easily track its movement. Get real-time fleet status and alerts. Quickly reassign drivers and routes as needed.

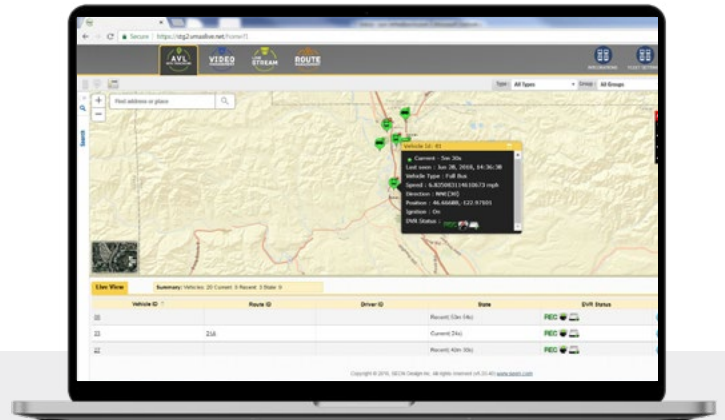

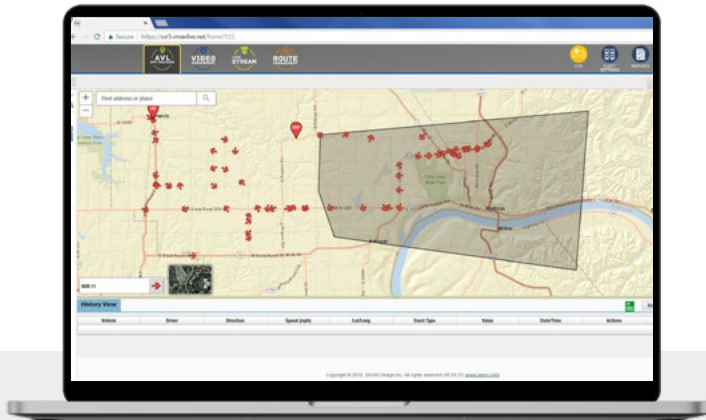

Video Surveillance and Vehicle Data Integration

Integrate with Safe Fleet solutions for recorder and camera health checks, live video streaming, and vehicle data such as idling, speed, mileage and breaking. Helps to identify fleet inefficiencies and driver behavior concerns.

Safe Fleet® Live+

Key Features of Safe Fleet Live+

Use GPS Data

To publish routes and driver directions.

Locate and Track

By school bus, route, driver or zone of interest.

Video System Health Check

Ensure video is always recording and identify any necessary vehicle maintenance.

Tap Into Live Video

Respond to emergencies rapidly and with the latest information through access to real-time live video from on-board the bus (optional).

Recreate and Report on an Incident

Identify specific geographical boundaries to create a zone of interest for future reporting.

Recreate movements of any vehicle, supplemented by telematics and video for first responder evidence packages, or quick responses to inquiries or complaints.
