Safe Fleet® Redact™

Fast, Simple, Reliable and Secure Automated Video Redaction

CAPABILITIES

- **Save/Edit/Return:** Save a specific frame or snapshot and redact sensitive elements to retain privacy, security and safety.

- **Run In Background:** Run multiple facial recognition, object tracking, or export rendering tasks in the background.

- **Any Object Tracking:** Auto-track identifying features, including tattoos, license plates, and street signs.

- **Redaction Options and Intensities:** Pixelation, mosaic, fill, blur, and outline, in box or oval shapes, with thirty-six user selectable colors/shades.

- **Edit Speeds:** Quick selectable speeds of 0.1x, 0.2x, 0.5x, 0.8x, 1x, 1.2x, 1.5x, 2x, and 4x and frame-by-frame viewing/editing.

- **Audio Redaction:** Search for specific words in an audio file (multiple language support) and redact with beep, silent or scrambled audio.

- **Export Range Selection:** Redact only the portion desired, or the entire original video as necessary.

- **3rd Party Video Support:** Supports most industry standard video formats.

- **Safe Fleet Video Support:** Supports most Safe Fleet In-Car Video System and FOCUS body camera videos natively.

- **Formats Supported:** Containers: MP4, TS, AVI, MKV, MOV and MPG
  Video: h264, mpeg-4, VP8, VP9, mpeg1video, mpeg2video, msvideo1.

FEATURES

- **Visual Identification:** Ability to number each redacted element.

- **Visual Highlighting:** Box or Oval outline on a subject for in-court presentations.

- **Unlimited Redaction:** One license per tenant, concurrent users and background processing.

- **Easy to Use:** Intuitive operation and features can be learned in a few hours, rather than days.

- **Safe Fleet Nexus Integration:** Redacted evidence is synched and available for use within the Safe Fleet digital evidence management platform.

VALUE

- **Accessible:** Cloud-based system offers ease of access and reduced learning curve.

- **Enhanced Redaction Processing Time:** Quick and efficient redaction processing results in improved user productivity.

- **Improved Scaling:** Handle more requests in less time; address greater number of harder to redact video, such as a body camera footage.

Safe Fleet Redact is a sensitive information, video redaction application for law enforcement agencies. It is also well suited for use by prosecutors, FOI staff, and anyone with similar redaction needs.
