

Smart Reach® Hotspot™

Enable Wi-Fi connectivity on your transit bus

Provide internet access to passengers on-board the bus. Includes a cellular router with external antenna and data plan.

- Enhance passenger customer service
- Maximize commuter's time with improved ability to multi-task

Enhance passenger commuting experience with improved access to internet service while on board the bus.

Data Plan Options

Offering multiple carriers on one device with automatic failover for extreme robust connectivity and coverage.

Enhanced Security

Enterprise class security and content filtering for protection from harmful content.

Captive Portal

Simplified and secure Wi-Fi login displayed to newly connected users.

Driving Safety Forward™

Enable Wi-Fi Connectivity on your Transit Bus

Enhanced passenger customer service through broadband internet access in a secure environment

Ruggedized Cellular /Wi-Fi Router and Antenna:

- 4 Ethernet ports with powerful Wi-Fi and 6-in-one dome external antenna.

Dual Carrier for Best Coverage Option:

- Capability to provide auto-coverage adjustment using smart DUAL-SIM technology. If one carrier LTE signal is weak in one particular area, the router will adjust to use the backup SIM carrier with better coverage.

Multiple Users with Enhanced Range:

- Up to 100 users connected through a single router.

Enables Additional Fleet Functionality:

- This high bandwidth solution enables the transit bus as a Wi-Fi Hotspot, while also providing the foundation necessary to activate any of the following Safe Fleet solutions:
 - Wireless Video Downloads
 - Live GPS and Fleet Tracking
 - Live Video Streaming
 - Pre-and Post-Trip Inspections
