

School Bus 8-Camera Cross View Video Solution

Get a Better View of Student Safety

Get a complete view of the school bus inside and out. This high-definition school bus surveillance solution offers high-definition recording up to 1080p across all 8 channels and up to 30 frames per second for best image quality and smooth video playback. High-back seats are no longer a problem with a wide-angle camera in a cross view application. Capture stop-arm violations in high-definition to protect students outside the bus.

Get complete coverage between the seats with cross-view configuration

Redundant recording to SD card independent of hard drive

Hybrid DVR supports both HD and existing analog cameras (backward compatible)

Scalable to Support:

Live GPS

Stop-arm Cameras

Wi-Fi Video Uploading

Student Tracking
