

Fleet Video/Evidence Management

Scalable, multi-site, multi-user, enterprise management software

Manage all of your video evidence through a single, web-based application that lets you search for and download video surveillance footage

View which vehicles in your fleet are connected, if any alarms have been triggered, the health status of your hardware and the status of your video download requests.

When wireless download ability is enabled, video with marked events can be automatically downloaded from a bus as it enters Wi-Fi coverage and is ready for viewing from a central location — eliminating the hassle and labor involved in retrieving video footage.

Geozone Functionality

Capture vehicle arrival and departure times within a geographical area of interest: bus depot, transit hub, school

Easy Health Reporting

Initiate regularly scheduled detailed or summary health reports so you are always updated on the status of your surveillance system

Hassle-free Video Retrieval

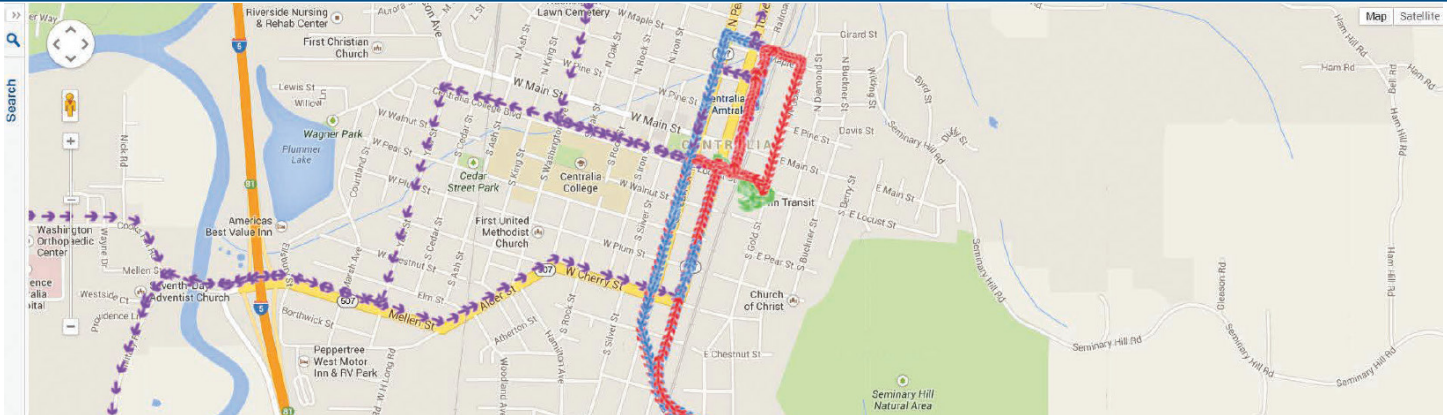

Eliminate hard drive handling costs and free up labor resources with automatic video downloading

Driving Safety Forward™

Fleet Video/Evidence Management

Scalable, multi-site, multi-user, enterprise management software

Key Features:

Powerful Search Feature

Find and display historical vehicle tracks from a specific date and time.

Increased Historical Data

See which buses have traveled in a geographical area within a specified time period.

Intuitive Design

When an alarm is triggered, the footage around the alarm is automatically tagged for download.

Easy Access to Critical Information

The alarms summary displays how many alarms have been triggered, the names of the specific alarms and how many alarm download requests have been completed.

Information the Way You Want It

Request low, medium or high priority video downloads from individual or multiple vehicles. Also retrieve high or low resolution camera footage, as well as which specific cameras to access.

Advanced Reporting

Web-based access to user accounts and system health reports. Control access to critical video by restricting and assigning permissions.

View GPS Tracks

View the GPS tracks of up to 5 vehicles on a map, with detail in two second intervals without downloading video.

Map-Based Video Search

Automatically locate any available video from a selected area on a map, when the actual time of the event is unknown.

Platform Options:

Your video evidence, your choice of cloud-based or on-premise implementation. The Safe Fleet Evidence Management System features a single code-base for either platform, so your decision can be based on what really matters to your operation.

Safe Fleet Commander:

Cloud-based, hosted platform - lowest cost to integrate with your existing corporate network.

Safe Fleet Depot Manager:

On Premise (your site) software - resilient to network outages.
