

Safe Fleet® SmartConnect™

Microsoft Dynamics Integration for Waste and Recycling Management
'One System, One Version of the Truth' for on-board data and back end operations

Manage your on-board and back end processes in one solution and gain new qualitative insights into all areas of your operation.

Leverage the strength of Microsoft's Business Intelligence for your waste and recycling operation.

Streamline your operation with an end-to-end solution that provides the full range of on-board waste routing and AVL data with Microsoft Dynamics 365 BC tegossuite software that encompasses every waste and recycling business need for use in Microsoft Dynamics' powerful ERP solution.

Increased Data Quality:

Access higher quality data that can be traced from source to end result, including associated consequences

Do More with Less:

Save time and money by eliminating the need to transfer and manage data between multiple tools and systems

Improved Performance:

Gain better quality insight, better and easier data management/ maintenance and increase operational efficiencies

Safe Fleet® SmartConnect™

Maximize the Value of your Business Investments with the End-to-End Solution Built for Waste and Recycling Management:

Access all financial and waste transactions per customer and supplier from an easy-to-use and flexible interface (view operating place, container information, contracts and orders per waste originator).

Analyze key performance indicators from custom reports (equipment utilization by territory or waste type).

Manage documents from one system (users can also store and retrieve proofs of disposal and weighbridge tickets).

Automate routine tasks via a flexible workflow sequence.

Allocate drivers, vehicles, equipment, and other waste disposal resources effectively and profitably.

Invoice customers flexibly from your stock values.

Record waste analysis findings accurately and securely.

Profiling, lab testing, pricing matrixes.

Set-up new contracts and orders, or service existing accounts quickly and efficiently.

Finance & Analytics

Manage your cash flow, inventory, payables, and fixed assets while leveraging best practices for accounting

Transportation

Accept orders, dispatch vehicles, and manage routes and logistics with on-board computers for real-time data integration

Equipment

Administer containers, schedule maintenance, and track history of their usage

Scalehouse

Plan purchases, order processing and take care of waste inspection and laboratory

Operations

Manage loads of materials by controlling inbound and outbound loads, improving visibility, and tracking transfer

Customer Service

Respond to customer service requests, organize resources for maximum efficiency, and boost customer satisfaction
