

WIRELESS STRENGTHS

Safe Fleet has been designing, implementing, and upgrading **wireless infrastructures** for almost **two decades**.

WE HAVE THE **KNOW-HOW** TO ENSURE A SUCCESSFUL **WIRELESS DEPLOYMENT** for any fleet with the **most demanding needs**.

Video evidence files when transmitted on low bandwidth networks, can

SLOW DOWN CONNECTIVITY

and even bring down the entire network.

ENHANCED SAFETY, DEFENDABLE DATA AND REDUCED RISK

can only happen when you have **access to your evidence** and not when you don't.

Customer Example:

The LAPD has over 600 vehicles in the field, uploading over

3,545 VIDEOS

in a ten-hour shift.

This is

5.4

videos uploaded per vehicle, per shift.

WHAT'S BEST FOR YOU

We won't suggest you need a new network **if you don't need one**.

If you have an existing network and it meets the needs of a video evidence system, we'll use it.

If your network just needs an update, we'll do that too.

If your system needs a completely new network, we'll do the legwork to provide you with high bandwidth and high reliability.

SECURITY PROTECTION

Our network architects ensure your system is

protected using the latest security best practices.

ENHANCED FUNCTIONALITY

Safe Fleet customers reliably enjoy the benefits of:

networks & services that employ

WI-FI & CELLULAR TECHNOLOGY

LIVE VIDEO STREAMING

for immediate access to sensitive and critical information

COST-EFFECTIVE

access to data that isn't of an urgent nature.

SAFE FLEET DIGITAL EVIDENCE MANAGEMENT & NETWORK LEADERSHIP

Safe Fleet was the first to provide IN-VEHICLE:

<p>REC</p> <p>unlimited pre-event & after-the-fact recording</p>	<p>redundant, fail-safe recording</p>	<p>touch screen interfaces</p> <p>automatic mode switching microphones</p>	<p>UPS based smart power management</p>	<p>meaningful event data such as event type, incident info etc.</p> <p>video LIVE streaming</p>	<p>advanced camera functionality like spot metering, gain control, and color balancing</p>	<p>video, Automated License Plate Recognition (ALPR) <small>plus computer</small></p> <p>3 in 1 system</p> <p>multiple, user-configurable video formats</p>

MORE REASONS TO CHOOSE SAFE FLEET

Digital evidence is critical evidence.

We've built out networks for hundreds of agencies across the **U.S. and Canada.**

We've been solving this challenge for **our customers for over 15 years.**

It's our expertise.

Each of our customers want to push as much video as possible to a network within a **small window of time.**

SAFE FLEET WAS THE FIRST TO PROVIDE BACKEND:

Enterprise (multi-server) solutions.

Auto-DVD solutions.

Tape library as extended storage.

Hands-free, automatic program and configuration data updates.

Multi-video playback.

Map-trace functions.

Ruggedized removable hard drives for video upload (in case wireless network is not available).
